

Elite engineers, deployed in 48 hours.

Ephemer connects Seed-to-Series C startups with senior engineers — Software, Infra, AI/Data, Product — ready to ship from day one. No bloated hiring cycles. No permanent headcount risk. Pure execution firepower, precisely when you need it.

// THE PROBLEM WE SOLVE

Hiring cycles kill momentum
Traditional recruitment takes 6–12 weeks. Your sprint can't wait. You need a senior engineer on the codebase by Monday.

Permanent hires are a bet
Series A companies shouldn't carry permanent headcount for a 3-month architecture sprint. Liquid talent is the smarter play.

Generalist agencies miss the mark
You need a Staff-level Rust engineer or a senior MLOps specialist — not a CV pile from a body shop. Precision matters.

// HOW IT WORKS

1

Brief
Share your mission scope, stack, and timeline. 30-min call or async form.
// day_0

2

Shortlist
We deploy our network. 3–5 pre-vetted senior profiles, matched to your exact brief.
// < 48h

3

Interview
You run the final call. We handle scheduling, context prep, and intro.
// day_2-3

4

Execute
Contractor onboards. Compliance via Deel. You ship.
// week_1

// WHAT WE STAFF

Senior · Lead · Staff · CTO

SE

Software Engineer
Backend · Frontend · Fullstack · Mobile

IE

Infra Engineer
Cloud · Platform · Security · CI/CD · Kubernetes

AI

AI / Data Engineer
ML Eng · MLOps · LLM/RAG · Data Eng · Analytics

PE

Product Engineer
Product Eng · PM · PO · Technical PM

// 3-LAYER VETTING

- 01

Technical assessment
Live coding via CoderByte. Stack-specific challenges. No whiteboard theatre.
- 02

Seniority validation
Reference checks · Career track verification · Profile & background verification.
- 03

Mission fit interview
Structured interview · Communication · Autonomy · Remote-first mindset · Mission alignment.
